INDEX OF PROCEEDINGS OF
ASSOCIATION OF OFFICIAL SEED ANALYSTS OF NORTH AMERICA
1908-1937

Index of Subjects

Note: Numbers in parentheses refer to number of meeting.

	Page
Absorption of water by seeds, cereals (10)	69
Actions taken by Association, advertising in annual reports favored (16)	7
annual dues set at $5.00 (7)	7
annual dues raised to $10.00 (19)	4
appropriation of $300 for expenses of delegates to congress in Holland in July, 1931 (22)	9
Assn. of Commissioners of Agriculture invited to present views at our next meeting (26)	242
certified laboratories to be designated in 1924 (14)	10
certified laboratories listed (16)	6
certification of laboratories discontinued (19)	5
"Certified-Label Plan", committee on, (28)	9
"Certified-Label Plan", committee report referred to new committee (29)	11
certified seed, a declaration (29)	11
committee to revise constitution (22)	9
committee to revise constitution (27)	8
committee to prepare history (27)	9
committee to assist Secretary in editing and publishing proceedings (27)	9
committee on labeling requirements in interstate commerce (28)	8
Actions taken by Association (cont.) committee on qualifications for seed analysts and for equipment (28)	8
committee to publish back numbers of Proceedings and index of all Proceedings (28)	9
"commonly accepted name" defined (15)	111
constitution revised and adopted (23)	10
constitution returned to committee (29)	10
cooperation of agronomists and crop improvement associations in publicity (28)	10
crop plants for purpose of seed analysis listed by states (17)	7
delegate to seed testing congress in Great Britain in 1924 (16)	10
direct method and standard method both to be used in referee testing (24)	93
disease indications recommended on certificate (15)	109
diseases of seeds given attention in rules (23)	10
duplication of work avoided by attention to recent work of Assn. (26)	242
editorial assistance to the Secretary (26)	241
employment for analysts (23)	10
ergot considered as inert matter (18)	7
even weight method of purity used for guidance only (15)	111
farmers not exempt from labeling seed (19)	4

	Page
Actions taken by Association (cont)	
financial aid from American Seed Trade Association not accepted (28)	9
form of report (17)	6
germination, shorter method of, favored over the stronger method (28)	8
germination requirements for flower seeds recommended, (15)	110
handbook first considered (23)	10
handbook work approved and request for completion (25)	173
handbook, work on, approved (27)	9
handbook in mimeographed form (28)	7
hard seeds referred to research committee as definite problem (12)	4
hard seed recommended added to germination, but also stated separately (14)	10
hard seed problem referred to joint committee from Seed Trade Association (15)	107
hard seeds, resolution on; "percentage germination" should not include hard seeds, but stated separately (6)	16
history of seed testing, work continued (28)	8
history committee to prepare material for publication (29)	10
International Seed Testing Assn., membership in (17)	7
International Rules for Seed Testing approved (20)	43
International Seed Testing Assn. invited to meet in U.S. 1934 (23)	9
International Crop Improvement Assn. meeting, delegates to (24)	93
International Seed Testing Assn., membership in, requested (28)	8
Actions taken by Association (cont)	
International Rules for Seed Testing, changes in, a resolution (29)	11
International Seed Testing Assn. in U. S. in 1940, committee on arrangement for meeting of (29)	11
International Analysis Certificate, use of, a resolution (29)	12
laboratories be designated by key-number unless otherwise desired (27)	10
method of electing officers (22)	100
"mixed seed" defined (15)	110
moisture determination given attention in rules (23)	10
mottled seeds in sweet clover, method of reporting (26)	241
name of association changed (28)	8
news letter authorized (20)	42
news letter continuation approved (21)	6
news letter to be continued (23)	9
nomination of officers by laboratories (28)	7
origin of seed studies recommended (14)	11
origin of seed (17)	6
"ounces" changed to "ounces or pounds" in Uniform Seed Law (20)	42
plant disease carrying possibilities of seed stock (29)	11
proceedings, charge of $2.00 per copy (19)	4
proceedings of one volume of 23, 24, 25, and 26 meetings to be sold for $3.00 per copy (29)	10
proceedings up to and including the 22nd to be sold at $1.00 per copy (29)	14
program committee authorized (21)	9

	Page
Actions taken by Association (cont)	
program committee discontinued (22)	9
program committee provided for (27)	9
proposed uniform vegetable seed law returned to committee (27)	10
"pure seed" defined (20)	43
purity and germination should be reported on same blank (7)	7
qualifications for analysts (16)	9
referee work delegated to research committee (14)	13
referee testing to be confined to monthly tests (23)	10
regional meetings considered (23)	10
research committee to consist of five members (28)	7
revision of interstate clause of Federal Seed Act (28)	8
rules and regulations for seed testing, committee to revise (7)	8
rules and regulations for seed testing accepted in amended form (8)	6
rules and regulations for seed testing directed to be printed (9)	5
rules for seed testing to be revised (26)	242
rules for seed testing, mimeographed copies distributed (28)	7
rules and recommendations for seed testing adopted (29)	10
rules for testing seeds passing in international commerce, approve the adoption of (7)	7
seal of association adopted (22)	9
seed samplers and triers studied (23)	10
Seed Council of North America, representative in (29)	10
seeds in interstate commerce, resolution (29)	11
soil tests for germination urged (26)	242

	Page
Actions taken by Association (cont)	
special committee to formulate comprehensive state seed testing service (22)	9
standards for laboratories (16)	9
state rights in seizure of interstate shipments of seeds favored (12)	4
stenographer to take notes at meetings (28)	7
sweet clover, reporting purity on white blossom - "Detroit Resolution" (20)	43
sweet clover resolution at Detroit meeting reaffirmed and made to apply to both yellow and white (24)	94
table showing number of seeds per gram recommended (14)	11
tolerance formula to be continued (23)	10
"trace" defined (16)	9
treasurer bonded (29)	10
uniform state seed law amended and referred back to committee (7)	7
uniform state seed law adopted (8)	6
uniform state seed law approved as amended (10)	54
uniform state seed law as modified by joint committee with Amer. Seed Trade Assn. was approved (10)	56
uniform label considered and resolution adopted (26)	241
uniform regulations for proposed uniform state seed laws (28)	8
uniformity of preparation of papers (26)	241
vegetable seed law referred back to committee and to American Seed Trade Assn. (25)	173
vegetable seed bill approved (26)	242
vegetable seed, standards of germination (28)	8

	Page
Actions taken by Association (cont)	
vegetable seed law referred to new committee (28)	8
vegetable seed law adopted (29)	10
voting confined to one member from each laboratory (16)	7
weed seeds evaluated according to viability (27)	10
wholesaler not held responsible for label (19)	4
winter meetings with A.A.A.S. to be resumed (26)	242
Alfalfa	
affidavit grimm (23)	34
California and Argentina compared (14)	52
correlation between plants in field and hard seed content (28)	56
different shapes, studies of (17)	14
germination by machine count and by hand count (12)	14
germination with candleglass method (18)	40
germination, variation in duplicate test (24)	115
hard seeds, duration of (14)	41
hard seeds, germination of as season advances (17)	31
hard seeds, influence of heat and cold on germination of (16)	75
hard seeds, notes on (14)	40
hard seeds, rest period (8)	20
hard seeds, value of in Alberta (19)	37
identification of, from Argentina (14)	49
impurities commonly found in Montana grown seed (22)	39
Italian, identification of (12)	24
middle western states and Argentina compared (14)	51
origin, study of (16)	46
production, cleaning, and distribution of (25)	213

	Page
Alalfa (cont)	
relative value of, green and ripe seeds (14)	37
scarified, germination tests of (20)	75
scarified, germination of (20)	80
seed producing areas of (24)	107
shapes of seed compared (18)	63
South Africa and Argentina compared (14)	54
Southwestern U. S. and Argentina compared (14)	52
variations observed in tests (8)	19
Annual Meeting	
Tabulated summary (28)	30
1908 - minutes (not given)	
officers (7)	2
register (not given)	
1909 - minutes (not given)	
officers (7)	2

Annual Meeting (cont)	
1932 - minutes (25)	173
officers (25)	171
register (25)	172
1933 - minutes (26)	241
officers (26)	237
register (26)	238
1935 - minutes (27)	7
officers (27)	5
register (27)	127
1936 - minutes (28)	7
officers (28)	3
register (28)	5
1937 - minutes (29)	10
officers (29)	5
register (29)	7
Apparatus	
air blast (8)	47
air blast separator, modification of (12)	18
fluorescence, equipment for examining seedlings for (25)	222
germinating corn and soybeans (28)	83
germination, referee (11)	3
germination by machine count and by hand count (12)	13
germination equipment recently installed in Virginia laboratory (21)	37
germinators (26)	294
germinator for blue grass (26)	283
germinator, daylight (16)	45
incubator, to control variations of temperature (13)	63
mixer, Kny-Scherer (8)	47
movement of seeds in bags when sampled with instruments (26)	278
new blower (29)	103
new sampler for sampling seed in the sack (26)	192
official seed laboratories, equipment of (16)	44
purity tests of seeds (7)	17
seed counter (9)	42
seed germination chamber, essentials of (18)	27
seed mixer and divider (29)	90
seed trier (7)	12

	Page
Apparatus (continued)	
sticker, long (7)	12
vacuum counter (26)	294
Auditing Committee (also see Treasurer)	
1915 report of (8)	12
1930 report of (23)	11
1931 report of (24)	96
1932 report of (25)	175
1933 report of (26)	244
1936 report of (28)	11
1937 report of (29)	15
Barley	
in Iowa oats (8)	41
germination, effect of pathogenes and disinfectants (27)	94
weight of seed, variation (8)	44
Beans	
germination of Fordhook Lima (27)	52
hardshell, its production and prevention (20)	52
infected, laboratory and field germination (23)	80
sclerema and hardshell (13)	60
seed treatments (23)	80
viability of, as affected by heat (11)	49
beginning of seed testing (22)	7
Beets	
germination capacity (8)	35
germination of (14)	93
germination, some phases of (19)	35
germination tests, variations in (18)	30
treatment for disinfection purposes (21)	28
Bent Grasses	
distinguishing the seeds (10)	76
Rhode Island bent seed and substitutes in trade (11)	64
Betterment of the Association, some thoughts on (25)	223
Bibliographer	
1925 report (18)	13
1925 committee members (18)	68
1927 report (20)	44
1929 report (22)	24
1932 report (25)	200
library of a seed laboratory (18)	65
recent literature in seed testing (20)	47
Black Locust	
germination of (27)	63
Blue Grass	
after-ripening (14)	97
blowing methods, studies on (29)	97
chi-square tests on purity analyses (29)	91
direct method for testing (23)	60
germination, blotters, bell-jars, and petri dishes (15)	119
germination, direct method (24)	141
germination duration (8)	46
germination, effect of storage (14)	97
germination, forcing (11)	53
germination, notes on (12)	14
germination, preliminary report (15)	119
germinator, suggested for (24)	283
germination tests, variations in (18)	30
inert matter, study of (10)	66
method of testing, improved (27)	44
Brome Grass	
inert matter, study of (10)	66
testing of (15)	120
Cabbage	
catalase, determination of viability (18)	37
germination of (20)	73
Carpet Grass	
germination of (20)	81

Page

Carrot
germination studies of (23) 73

Cauliflower
germination of (20) 72

Cathode Rays
influence on germination (20) 70

Celery
germination, further studies (20) 69
germination tests, variations in (18) 30

Certified Label Plan Committee
1937 report of (29) 40

Clover, Alsike
analyzing and labeling of (20) 64
germination by machine and by hand count (12) 14
germination with candleglass method (18) 40
longevity of (12) 23
production, cleaning, and distribution of (25) 213
variations in tests (18) 30

Clover, Crimson
germination, greenhouse and laboratory (11) 64
germination, influence of moisture and temperature (14) 93
germination, prevention of wide variations (14) 90
germination, soil, greenhouse, and blotters (8) 22
germination tests (20) 62
germination tests, variations in (8) 45
low grade imported (8) 37
variations observed in tests (8) 18

Clover, Red
catalase, determination of viability (18) 36
color characteristics of (12) 30

Page

Clover, Red (Continued)
French and Italian compared as to color (17) 22
germination by machine and hand count (12) 13
germination of cracked and broken seeds (20) 68
germination tests, variations in (8) 45
germination tests, variations in (18) 30
germination with candleglass method (18) 40
hard seeds, duration of (14) 41
Italian (14) 100
Italian, identification of (12) 24
longevity of (12) 23
origin, indicated by color and weight (17) 19
origin, study of (16) 46
production, cleaning, and distribution of (25) 213
uniform examination and description of (14) 75
vitality of seeds of different colors (12) 32
weight per thousand seeds (12) 31

Clover, Sweet
analyses by American and European methods (21) 43
annual and biennial, determination of (14) 102
areas which may produce seed (24) 105
germination by machine and hand count (12) 13
germination, hulled and unhulled (8) 23
germination, laboratory and field germination (28) 58
germination, scarified (20) 76
germination, scarified (20) 81
germination, variation in duplicate tests (24) 115
germination with candleglass method (18) 40
hard seeds, agricultural value in Alberta (21) 63
hard seeds, correlated with

Page

Clover, Sweet (continued)
plants in field (21) 57
hard seeds, duration of (14) 41
hard seeds, germination as season advances (17) 31
hard seeds, influence of heat and cold (16) 75
hard seeds, value of in Alberta (28) 63
identification of (26) 254
identification of yellow and white (25) 174, 196
identification of white and yellow (28) 58
identification of white and yellow flowered seed (18) 62
identity of (12) 25
mottled seed, Cooperative Service Committee Study (22) 23
mottled seeds in (26) 266
mottled seeds in (27) 25
production, cleaning, and distribution of (25) 213
relative value of green and ripe seeds (14) 37
scarified seed, comparative value of (21) 62
time required for analyzing (27) 50
uniformity in method of reporting (20) 43

Clover, White
germination with candleglass method (18) 40

Constitution
original constitution (7) 4
1918 committee on revision (11) 3
1918 report of committee (11) 6
1930 committee on revision (23) 7
1930 revision accepted (23) 10
1936 committee on revision (28) 4
1936 revision presented (28) 8
1937 committee on revision (29) 2
1937 proposed constitution returned to committee (29) 10

Page

Control
assessment of penalties by administrative officers (16) 57
controlling factors in states (18) 18
experiences in Canada (18) 25
extension program (24) 131
fields as part of equipment of seed testing station (27) 80
fields requisite to laboratory (25) 217
flower seed sales (29) 89
governmental control of garden seed sales (12) 28
incubator, variations of temperature (13) 63
legislation as applied to (19) 10
methods of, publicity and education (28) 21
state control work, factors affecting (19) 9
uniform weed law (22) 20
weed and seed, problems in (24) 156
weed control program (27) 117
weed, in Redwood County, Minnesota (24) 165
weed, in Saskatchewan (25) 226

Cooperation, Extension and Publicity Committee
1924 report (17) 11
50
1925 report (18) 14
1925 members (18) 68
1926 report (19) 5

Cooperative Service Committee
1927 report (20) 44
1928 report (21) 10
1929 report (22) 23
1930 report (23) 31
1931 report (24) 104
1932 report (25) 200
1933 report (26) 265
1935 report (27) 25
1936 report (28) 19
mottled sweet clover,

	Page
Cooperative Service Committee (Cont)	
study of (22)	23
Cooperation	
official seed analysts and seed trade (11)	38
seed trade and analysts (15)	141
state seed laboratories and seed trade (14)	30
Corn	
absorption of water by kernels (28)	62
germination, equipment for (28)	83
germination, further studies of (19)	27
germination study (18)	50
viability of, as affected by heat (11)	50
Cotton	
germination, effect of temperature and time of exposure (14)	97
germination of (16)	64
Cowpeas	
viability of, as affected by heat (11)	49
Cucurbit Seed	
germination of (29)	133
Development	
analytical methods, European laboratories (8)	26
organization, development and activities of association (11)	15
development and activities of the Association (7)	5
pure seed work in Wyoming (10)	63
Disclaimer (28)	44
Disease diagnoses in seed analysis reports (21)	7
Dodder (8)	37
germination (10)	65
Dormancy	
analysts interest in (14)	90
Dormancy (Cont)	
catalase of, as influenced by soaking (18)	38
factors having possible causal relation (12)	16
chemical changes (12)	17
Kentucky blue grass (14)	97
nature of, and after-ripening (12)	15
newly harvested grain and grass seeds (11)	51
newly threshed grain (16)	28
occurring in salsify seed (26)	286
temperatures for after-ripening of seeds (11)	46
three main types of (26)	291
wheat, progress report (14)	80
Education and Extension Committee	
1925 members (18)	68
1925 report (18)	15
Enforcement	
more general and efficient (16)	54
questionnaire (18)	21
seed law (22)	30
seed law of New Jersey (7)	20
some phases of (18)	23
use of tolerances in (23)	53
Executive Committee	
1915 members (8)	3
1917 meeting (10)	55
1925 members (18)	68
1931 report (24)	97
1932 report (25)	176

Revision of Rules Committee	
1937 report (29)	59
Rules and Regulations Committee	
1908 members (7)	3

	Page
Rules for Seed Testing	
changes in (17)	35
inert matter (8)	47
pure seed, defined (8)	47
rules and recommendations for seed testing (29)	61
rye seeds, broken (8)	48
1936 report (28)	17
1937 report (29)	59
Rutabaga	
germination of (20)	71
Rye	
viability of as affected by heat (11)	50
Ryegrass	
fluorescence, readings of (29)	136
greenhouse and chamber tests (18)	28
Salsify	
dormancy in (26)	286
Salvia, development of hilum (20)	57
Sampling Seed	
method of (29)	66
moving of seed in bags when sampled with instruments (26)	278
sampling from sack and drawing working sample (27)	17
uniform methods of (7)	10
Secretary	
1916 report (9)	7
1917 report (10)	56
1918 report (11)	12
1919 report (12)	5
1920 report (13)	36
1921 report (14)	14
1922 report (15)	111
1923 report (16)	11
1924 report (17)	8
1925 report (18)	8
1929 report (22)	11
1934 report (29)	13
Seed Analyst	
commercial, problems of (15)	133
exchange between seed laboratories (20)	46
functions of (25)	208
future (14)	35
seed-borne plant diseases, responsibility (11)	31
seed laws (20)	48
training, ideas, and future (27)	121
uniform seed legislation, relation to (16)	54
variations and tolerance, seed analyst compared with chemist (23)	47
Seed Buying Public	
address on (29)	23
Seed Counter	
comparison of machine count with hand count (12)	14
Seed Importation Act	
extend operation of to interstate shipments of seed (13)	41
further importation of low grade seed (9)	21
operation of (10)	79
Seed Laboratory Notes	
certification of laboratories (16)	11
certification of laboratories (17)	51
certification of laboratories (18)	13
certification, changes recommended (19)	35
control fields or trial ground, requisite to (25)	217
control fields as part of equipment (27)	80
exchange of seed analysts by seed laboratories (20)	46
fees for testing in various laboratories (19)	45

	Page
Seed Laboratory Notes (continued)	
functions of laboratory (25)	208
funds required to operate (19)	46
libraries, working (18)	64
North Dakota - year 1916-17 (10)	67
public service rendered by New Jersey laboratory (28)	11
public service work of Canadian laboratory (28)	11
public service activities of Michigan laboratory (28)	11
publicizing work of laboratories (26)	271
publications for libraries (18)	65
work of various laboratories (23)	23
Seed Laboratory Organization	
Colorado (11)	35
Seed Laws	
application of, in Canada (14)	33
criticisms pending legislation, 1910 (12)	7
enforcement of, more general and efficient (16)	54
enforcement, some phases of (18)	23
enforcement (22)	30
enforcement questionnaire (18)	21
federal seed legislation (18)	21
legislation as applied to seed control (19)	10
national seed legislation (16)	13
new and amended state seed legislation (18)	16
New Jersey (7)	20
new laws enacted in seven states, 1919 (12)	7
new laws presented in fourteen states, 1919 (12)	7
objections to governmental control of garden seed sales (12)	28
proposed label requirements for vegetable seed law (13)	40
seed laws amended in five states, 1919 (12)	7
Seed Laws (continued)	
seed regulation as a seedsman sees it (9)	15
seedsmen's viewpoint of seed laws and seed testing (11)	42
seed legislation (9)	12
seed analyst (20)	48
state and federal (29)	47
states not having seed laws(19)	9
state weed legislation (16)	50
Stone's criterion on noxious weed seeds, effects of (22)	19
uniform, principles proposed for (8)	15
uniform, vegetable and truck crop seeds (12)	9
vegetable seed law in Virginia (16)	38
vegetable, proposed (27)	22
Wyoming (10)	63
Seed Standardization and Certification	
North Dakota (9)	37
test gardens, aid to (17)	16
Seed Testing	
basis for tolerances and limitations (23)	49
beginning of seed testing (22)	7
botany of (19)	15
broken seeds of cereals (21)	26
education of seedsmen (14)	28
efficiency, problems of (9)	16
European and American methods, problems in comparing (21)	48
international rules for seed testing discussed (20)	43
international trade with Canada (17)	27
lawn grass seed mixtures (15)	145
methods, American and European compared (20)	50
Paspalum dilatatum (29)	148
pathological aspects of (24)	128
notes on (26)	288
problems pertaining to (8)	45
projects under investigation or contemplated (13)	45
recent literature (20)	47

	Page
Seed Testing (continued)	
research and advancement in (26)	245
rules and recommendations for (29)	61
scientific worker and the seed trade (15)	131
seedsmen's viewpoint of (11)	42
suggested method of (22)	47
tolerance for minor impurities (21)	18
variations, application of tolerance formula (13)	62
variations in (23)	41
Seed Trade Association	
message from (28)	37
problems of (29)	26
Seeding Value	
provisional index for field seeds (17)	43
Seizure Clause	
arguments for clause (14)	20
arguments against clause (14)	22
controversy (14)	18
legal opinions on (14)	20
Pennsylvania injunction clause (14)	20
proposed seizure provision (14)	19
states which have enacted clause (14)	20
Soil Germination Tests Committee	
1932 report (25)	187
Sorghum	
behavior of broken seeds (17)	33
factors causing low germination (21)	23
hybrids, occurence of (17)	14
Sources of Seed	
indicated by foreign seeds (7)	31
Soybeans	
equipment for germination (28)	83
viability of, as affected by heat (11)	50
Soybeans (continued)	
viability of different varieties in North Carolina (23)	69
viability, influence of storage condition (27)	125
Spinach	
germination tests (24)	121
investigations in germination (24)	122
methods of germinating, New Zealand (21)	36
variations in germination tests (18)	30
Sudan Grass	
chemical analysis compared with Johnson grass (11)	58
hybrids, occurrence of (17)	14
Survey of Weed Seed Impurities in Canada (19)	15
Sweet Clover (see clover)	
Time of Flowering and Viability Committee	
1933 report (26)	249
Timothy	
analyzing and labeling of timothy and alsike (20)	64
germination, hulled and unhulled (8)	21
germination, effect of commercial blue blotting paper (13)	55
longevity of (12)	23
production, cleaning, and distribution of (25)	213
variations observed in tests (8)	19
variations in germination tests (18)	30
Tolerance Studies	
basis for, limitations in practice (23)	49
impurities in seed testing (21)	18

	Page
Tolerance Studies (continued)	
limits in weed seeds (12)	26
purity variations (9)	18
purity and germination, same problem (27)	101
rules and application (23)	13
use in law enforcement (23)	53
variations occurring in seed tests and its relation to application of tolerance formula (13)	62
what the analyst can learn from the chemist (23)	47
Tomato	
pathogenic associates of (28)	108
Treasurer	
1916 report (9)	9
1917 report (10)	57
1918 report (11)	14
1920 report (13)	37

1922 report (15)	113
1923 report (16)	16
1925 report (18)	11
1928 report (21)	10
1929 report (22)	13
1935 report (27)	11
Turnip	
catalase, determination of viability (18)	37
germination of (20)	71
viability of 20-year old (18)	37
Uniform Seed Bill	
amendments to uniform State seed law (13)	41
amendments proposed (13)	38
amendments to (13)	38
amendments to (16)	50
amendments considered (19)	9
approved by joint committees of Seed Analysts Association and Seed Trade Association (10)	55
principles proposed for (8)	15
proposed amendments (20)	48
proposed amendments (21)	15
proposed vegetable law (22)	17
Uniform Seed Bill (continued)	
proposed (27)	22
provisions at present (19)	9
recommendations relative to (16)	50
regulate sale of vegetable seed (14)	17
relation of seed analysts to (16)	54
resolutions approved regarding vegetable seed law (21)	15
state vegetable seed law (15)	113
state vegetable seed law (29)	41
uniform seed label (27)	27
	113
(26)	243
vegetable and truck crop seeds (13)	39
weed control law (22)	20
Variations	
analyses of orchard grass seed (17)	28
causes of (23)	21
changes in weights under laboratory conditions (21)	21
changes in weight and percentage composition of seed samples (23)	56
germination and purity tests (8)	20
germination, duplicate tests (16)	40
germination tests of vegetable seeds (17)	40
germination tests of various seeds (18)	29
germination tests, alfalfa and sweet clover (24)	115
incubator, to control temperature (13)	63
observed in purity and germination tests (8)	18
occurrence in seed tests and relation to application of tolerance formula (13)	62
possibility of prevention in germination of crimson clover (14)	90
purity, tolerance for (9)	18

	Page
Variations (continued)	
purity analyses (23)	45
purity and germinations tests as influenced by sampling (23)	42
seed testing (23)	41
what seed analyst can learn from the chemist (23)	47
Vetch	
methods of testing for purity (13)	60
Ascochyta pisi viciae in (27)	82
germination of hard seed (18)	42
Viability of Seeds	
Canada thistle in Montana (24)	152
catalase as means of determining (18)	33
Chewing's Fescue (28)	76
hard seed, suggestion for testing (27)	62
hard seed of legumes which have remained in soil (22)	35
heat, varying degrees of (11)	48
Johnson grass, tests of (12)	15
low, in chamber tests and room tests (12)	15
new substrata for tests (25)	225
ordinary, in chamber tests and room tests (12)	15
peas, field (19)	34
peas, laboratory and field tests (18)	55
relation of plumpness to color (21)	28
soybeans, influence of storage conditions (27)	125
soybeans in North Carolina (23)	69
Weed Seeds	
California cereals (14)	56
California problem (24)	161
Canadian survey (24)	163
Canada thistle seed production and viability in Montana (24)	152
control in Redwood County, Minnesota (24)	165
control in Saskatchewan (25)	226
content of seeds (7)	23
content of commercial seeds (7)	29
dodder (8)	37
dodder, germination (10)	65
evaluation (27)	16
exchange (26)	266
exchange (27)	26
germination, injured (28)	68
impurities found in seed oats (24)	148
introduced into the garden through packet seeds (24)	151
Iowa oats, in (8)	42
irrigation water as factor in dissemination of (12)	20
laboratory germination of (24)	125
Minnesota oats, in (8)	43
noxious, basis of ounces or pounds (20)	42
noxious, effect of applying Stone's criterion (22)	19
noxious weed seeds in Minnesota and source of samples (24)	159
project under investigation or contemplated (13)	45
seed-like stone cell bodies in commercial seed (14)	56
tolerance limits (12)	26
uniform control law (22)	20
weed seed control, problems (24)	156
wild oats, germination of (9)	35
Welcoming Address	
Honorable Henry A. Wallace 1937 (29)	9
Wheat	
analytical and mycological study of (28)	89
catalase, determination of viability (18)	37
dormant, progress report (14)	80
germination, abnormal (26)	284
germination, delayed (16)	23

	Page
Wheat (continued)	
longevity of (12)	22
seed value, interpretation of (17)	41
viability of as affected by heat (11)	51
viability of 20-year old (18)	37
weight per bushel in relation to seed value (28)	59
Wheatgrass	
germination, preliminary work on (27)	56
quack grass, compared with (18)	63
testing of (15)	120
Wheatgrass, Crested	
germination of (27)	66
germination of (28)	86
Wheatgrass, Slender	
comparison with brome grass (15)	122
inert matter, study of (10)	66
Wild Carrot	
study of (21)	35
Wild Oats	
germination characteristics of (23)	70
germination, laboratory and greenhouse (9)	35

Index of Names

Note: Numbers in parentheses refer to number of meeting, the numbers following refer to pages.

Allen, L. N. (24) 91 (25) 171 (28) 3, 4, 10 (12) 25 (29) 5, 6, 12, 42

Allen, Louise (9) 4, 28

Ayres, Jessie C. (18) 16 (21) 28 (22) 5 (23) 7 (24) 91, 104, 105, 149 (25) 171

Ball, W. S. (24) 161

Bass, C. M. (14) 90 (21) 36, 37 (23) 7, 12, 22 (24) 91, 97, 102, (25) 171, 176, 179 (26) 237, 238, 245, 247, (27) 5, 12 (29) 5, 55

Berry, L. S. (8) 5 (11) 5

Bessey, Ernst (10) 53 (11) 10
